

US Army Corps
of Engineers®

Achieve mastery of the Environmental Operating Principles through Native American Environmental & Cultural Resources Training

Environmental Operating Principle # 7 :
Respect the views of individuals and groups interested in Corps activities; listen to them actively, and learn from their perspective in the search to find innovative win-win solutions to the Nation's problems that also protect and enhance the environment.

Environmental Operating Principle #4:
Continue to accept corporate responsibility and accountability under the law for activities and decisions under our control that impact human health and welfare and the continued viability of natural systems.

Sustainability

Environmental Operating Principle # 3:
Seek balance and synergy among human development activities and natural systems by designing economic and environmental solutions that support and reinforce one another.

Environmental Operating Principle # 2:
Recognize the interdependence of life and the physical environment. Proactively consider environmental consequence of Corps programs and act accordingly in all appropriate circumstances.

Environmental Operating Principle # 1:
Strive to achieve Environmental Sustainability. An environment maintained in a healthy, diverse, and sustainable condition is necessary to support life.

Environmental Operating Principle # 5:
Seek ways and means to assess and mitigate cumulative impacts to the environment; bring systems approaches to the full life cycle of our processes and work.

Environmental Operating Principle # 6:
Build and share an integrated scientific, economic, and social knowledge base that supports a greater understanding of the environment and impacts of our work.
